

CAPSULE
JOSEPH W. SCOTT HOUSE

Dr. Grafton M. Bosley was initially responsible for the residential development of west Towson. He was a prominent land owner who is especially noted for having donated part of his estate for the site of the Court House and Jail in 1853. By 1899, Bosley Avenue, Allegheny Avenue, W. Pennsylvania Avenue, W. Chesapeake Avenue, Highland Avenue and later Central Avenue were laid out for accessibility to lots ready for public development. Although he died in 1901 before much development took place, Dr. Bosley was represented by his trustees who continued to administer his land.

Presently, areas such as west Towson are seeing the commercial growth of central Towson slowly creeping into their own neighborhoods. However, very few high rises are seen here (existing only on two border areas) and many commercial alterations have been sensitive to the residential quality home owners are hoping to maintain.

One such structure is # 305 Allegheny Avenue. The only basic alterations have been enclosed porches. The main block still looks much as it did when the house was new in 1920, including the characterizing brown wooden shingles.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Exterior Only:

305 Allegheny Avenue has seen some modern alterations but for the most part contains much original exterior fabric. The nearly square main block is a gabled frame structure covered with brown wooden shingles. It rests upon a five foot high stone foundation and measures a very wide two bays by approximately three bays long.

The gabled end facing north is the main facade. The first story gabled roof porch has been enclosed for commercial purposes. The second level, however, remains unchanged and contains a pair of 1/1 sash windows with louvered shutters in each bay. The gable is vented by a smaller pair of 1/1 sash.

The roof has deep eaves with exposed rafter ends.

The east facade displays an irregular fenestration in placement and size. That which is irregular includes an entrance door in the north bay of the first level (alteration), a small window off center to the south between the first and second level, and an unusually large 1/1 sash window in the north bay of the second level.

The eastern one-half of the south facade has an enclosed shed roof porch with an entrance on the east side being covered with a shed roof also.

The high foundation contains an entrance in the west bay.

The outstanding feature of the west facade is the squared bay window with a shed hood in the south bay of the first level. It contains two large 1/1 sash windows.

Square casements flank a brick corbeled exterior-end chimney which pierces the eaves of the roof. This causes the second story windows to be placed unevenly South of the chimney.
